I just let her know about this. I can get a draft to her early so she can spend some time reviewing.

His well has slightly elevated nitrates, bacteria and he recently sent PFAS sampling results with single digit PPT levels of PFOA, but there was no QA information or any information about the sampling method or even who did the sampling.

Chuck and Pete went to inspect two locations he's complained about: Inland Bays WWTP which spray irrigates their effluent and is not NPDES permitted; and a Lawson Road site where dumping or materials handling may have occurred. Neither they or DNREC could reach the property owner, so when they inspected in March, they could not get on site at the Lawson Rd. location, but they

observed it from the boundaries. DNREC finally reached the owner/operator of that site and an inspection is now scheduled for mid-June and will include a DNREC criminal investigator along with staff from other programs. Pete plans to join them.

They found no evidence of surface runoff from the Inland Bays WWTP; they were looking for potential stormwater or unpermitted discharges to surface waters and found none.

Ex. 5 Deliberative Process (DP)

Many people have looked into these complaints. They were referred to CID last year. Ex. 5 Deliberative Process (DP)
Ex. 5 Deliberative Process (DP) CID recently met with Mr. Ex. 5 Personal Privacy (PP) and
reviewed all of his information. Ex. 5 Deliberative Process (DP) I informed them of the upcoming
EPA/DNREC inspection at the Lawson Rd. site.

Oh gosh. Well I didn't see much about wells.. only about the part about people dying.....

I echo what Jess said... if there is something we can do to help....

I've handled previous communications with Mr. Ex. 5 Personal Privacy (PP). His complaints tend to come back to his contaminated private well Ex. 5 Deliberative Process (DP). I can prepare a response. I haven't read through this new incoming letter, but I can imagine what it says.
